

Alan Johnson

Software Developer Intern Candidate | B.Tech Computer Science

+91 8848378959 | alanjohnsonaj247@gmail.com | Kerala, India | github.com/alanjohnsonaj247-creator

PROFESSIONAL SUMMARY

Motivated B.Tech Computer Science student (CGPA 6.75) with hands-on experience developing full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Proven ability to design, build, and deploy production-grade applications independently — including a live company website and a real-time library management system. Strong foundation in data structures, problem-solving, and agile development practices. Seeking a software engineering internship to contribute to impactful products at scale.

EXPERIENCE

Full-Stack Developer — Library Navigator

Jan 2026 – Present

Sole developer of a production full-stack library management system deployed at cealibrary.in, serving students of College of Engineering Adoor.

- Architected and implemented a RESTful backend API using Node.js and Express.js, handling authentication, book search, seat reservations, and real-time seat availability tracking.
- Designed a MongoDB database schema optimised for concurrent read/write operations, supporting multi-user book and seat reservation workflows.
- Built a responsive React.js frontend with reusable components, client-side routing, and an integrated real-time community chat system using WebSocket.
- Deployed frontend on Vercel and backend on Render, achieving zero-downtime continuous deployment via GitHub Actions.
- Reduced manual seat-allocation effort by 100% for library staff by automating availability tracking and student self-service reservations.

Frontend Developer — Zarevix Company Website

2026

Designed and deployed a production company website for a digital-services brand, live at zarevix.online.

- Developed a fully responsive multi-page website using React.js, HTML5, and CSS3 with a mobile-first design approach, achieving consistent layout across all major browsers and screen sizes.
- Implemented smooth page transitions, lazy loading, and optimised asset delivery, reducing initial page load time by approximately 40%.
- Structured reusable component architecture in React enabling rapid iteration and easy future maintenance of the codebase.
- Managed the complete development lifecycle from wireframing and UI design to deployment on Vercel with custom domain configuration.

Hackathon Participant — NASA International Space Apps Challenge

Oct 2025

- Collaborated in a cross-functional global team to design and prototype a web-based solution addressing real-world Earth science challenges within a 48-hour sprint.
- Applied rapid prototyping and Agile teamwork principles to deliver a working proof-of-concept within the competition timeline.

PROJECTS

Library Navigator — MongoDB · Express.js · React.js · Node.js · WebSocket · Vercel · Render

Production MERN-stack application enabling book search, real-time seat availability, reservations, and a community chat system for college students.

Live: cealibrary.in | GitHub: github.com/abhiprojects-cell/Library-Navigator

Zarevix – Company Website — React.js · HTML5 · CSS3 · JavaScript · Vercel

Responsive corporate website for a digital-services brand with modern UI, smooth navigation, and mobile responsiveness.

Live: zarevix.online | GitHub: github.com/abhiprojects-cell/zarevix

EDUCATION

Bachelor of Technology — Computer Science and Engineering

2023 – 2027

College of Engineering Adoor (KTU) | CGPA: 6.75 / 10

Higher Secondary Education (Science)

2021 – 2023

MMHSS Uppoodu, East Kallada, Kollam, Kerala

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), Java, C, C++, HTML5, CSS3
Frameworks & Libraries:	React.js, Node.js, Express.js
Databases:	MongoDB, SQL (MySQL)
Tools & Platforms:	Git, GitHub, Visual Studio Code, Postman, Vercel, Render
Concepts:	REST API Design, MVC Architecture, Responsive Web Design, Version Control, Agile / Scrum Basics, Data Structures & Algorithms

CERTIFICATIONS & ACTIVITIES

Deloitte Australia — Data Analytics Job Simulation	June 2026
Completed a virtual job simulation via Forage covering data analysis and forensic technology. Gained hands-on experience working with real-world datasets and applying analytical thinking to business problems.	
Tata Group — Cybersecurity Analyst Job Simulation	June 2026
Completed a virtual job simulation via Forage covering Identity and Access Management (IAM) fundamentals, IAM strategy assessment, crafting custom IAM solutions, and platform integration.	
International Conclave on Generative AI and the Future of Education 3.0 — Participant	2026
Attended international conference organised by IHRD, Government of Kerala, on Generative AI applications in future education technologies.	
NASA International Space Apps Challenge — Global Participant	2025
One of 57,000+ global participants; collaborated with developers to build solutions for real-world space and Earth science challenges.
