Kerala, India | +91 8848378959 | alanjohnsonaj247@gmail.com | github.com/alanjohnsonaj247-creator

PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering student (CGPA 7.02/10) with hands-on experience in Full-Stack Software Development using the MERN stack (MongoDB, Express.js, React.js, Node.js). Independently designed, built, and deployed two production web applications, including a library and student engagement platform and a corporate website, covering system design, REST API development, database design, and cloud deployment. Skilled in Data Structures and Algorithms, Object-Oriented Programming, Version Control, and Agile/Scrum development practices. Seeking a Software Engineer / Software Developer Intern role to deliver measurable engineering impact.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), Java, C, C++, HTML5, CSS3
- **Frameworks and Libraries:** React.js, Node.js, Express.js, REST API Design
- **Databases:** MongoDB, SQL (MySQL)
- **Tools and Platforms:** Git, GitHub, GitHub Actions, Visual Studio Code, Postman, Vercel, Render
- **Core Concepts:** Data Structures and Algorithms, MVC Architecture, Responsive Web Design, Agile and Scrum, CI/CD, Software Engineering

PROFESSIONAL EXPERIENCE

Full-Stack Developer, Library Navigator (Sole Developer)

January 2026 - Present

Full-stack library and student engagement platform live at cealibrary.in, serving students of College of Engineering Adoor

- Architected and developed a scalable full-stack platform using React (Vite), Node.js, Express.js, and MongoDB, independently owning the system from database design through production deployment.
- Implemented secure authentication workflows including registration, login, OTP verification, and password recovery, safeguarding user accounts across the platform.
- Built core library functionality including book browsing, detailed book pages, and real-time seat booking, using a MongoDB schema optimized for concurrent multi-user read and write operations.
- Integrated an AI-powered chat assistant, real-time community chat, and gamified engagement features, including an interactive Imposter game and exam preparation tools, to increase student interaction.
- Developed an admin dashboard for content and user management; deployed the application with the frontend on Vercel and backend on Render, achieving zero-downtime continuous deployment via GitHub Actions and eliminating 100 percent of manual seat-allocation effort for library staff.

Frontend Developer, Zarevix Company Website 2026

Production corporate website for a digital-services brand live at zarevix.online

- Developed a fully responsive, multi-page website using React.js, HTML5, and CSS3 with a mobile-first design approach, ensuring consistent rendering across all major browsers and screen sizes.
- Optimized application performance through smooth page transitions, lazy loading, and asset delivery tuning, reducing initial page load time by approximately 40 percent.
- Structured a reusable component architecture in React and owned the complete development lifecycle, from wireframing and UI design through deployment on Vercel with custom domain configuration.

Hackathon Participant, NASA International Space Apps Challenge

October 2025

- Collaborated in a cross-functional global team to design and prototype a web-based solution for a real-world Earth science challenge, applying rapid-prototyping and Agile teamwork principles to deliver a working proof-of-concept within a 48-hour sprint.

PROJECTS

Library Navigator | React, Vite, Node.js, Express, MongoDB, WebSocket, Vercel, Render

- Full-stack library and student engagement platform featuring secure authentication, real-time seat booking, an AI-powered chat assistant, community chat, an admin dashboard, and gamified student engagement and exam-support tools.

Live: cealibrary.in | GitHub: github.com/abhiprojects-cell/Library-Navigator

Zarevix Company Website | React.js, HTML5, CSS3, JavaScript, Vercel

- Responsive corporate website for a digital-services brand featuring a modern UI, smooth navigation, and mobile-first responsiveness.

Live: zarevix.online | GitHub: github.com/abhiprojects-cell/zarevix

EDUCATION

Bachelor of Technology in Computer Science and Engineering 2023 - 2027
College of Engineering Adoor (KTU) | CGPA: 7.02 / 10

Higher Secondary Education (Science) 2021 - 2023
MMHSS Uppoodu, East Kallada, Kollam, Kerala

CERTIFICATIONS AND ACTIVITIES

- Deloitte Australia, Data Analytics Job Simulation, Completed via Forage, June 2026, covering data analysis and forensic technology with hands-on application to real-world datasets.
- Tata Group, Cybersecurity Analyst Job Simulation, Completed via Forage, June 2026, covering Identity and Access Management (IAM) fundamentals, strategy assessment, and platform integration.
- International Conclave on Generative AI and the Future of Education 3.0, Participant, 2026, organized by IHRD, Government of Kerala.
- NASA International Space Apps Challenge, Global Participant, 2025, one of 57,000+ participants worldwide.

LANGUAGES

English (Professional Proficiency), Malayalam (Native), Hindi (Working Proficiency), Tamil (Basic)
